UNSC SUPERCARRIER GROUP

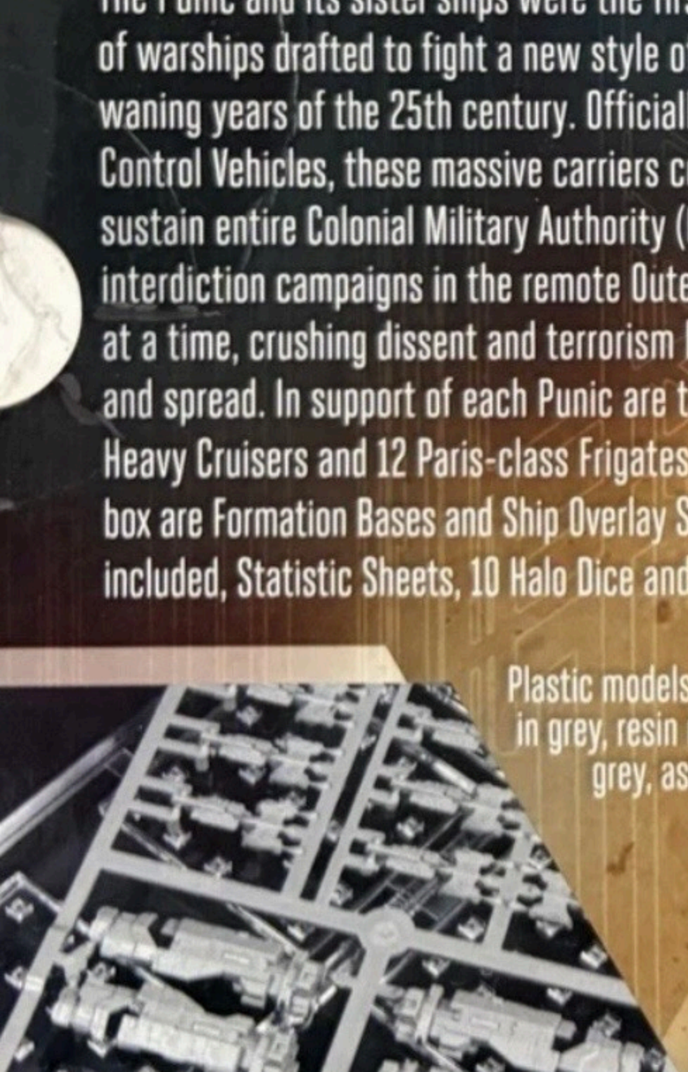
The Punic and its sister ships were the first of a new breed of warships drafted to fight a new style of colonial war in the waning years of the 25th century. Officially designated Space Control Vehicles, these massive carriers could transport and sustain entire Colonial Military Authority (CMA) expeditionary and interdiction campaigns in the remote Outer Colonies for months at a time, crushing dissent and terrorism before it could fester and spread. In support of each Punic are two Marathon-class Heavy Cruisers and 12 Paris-class Frigates. Also included in the box are Formation Bases and Ship Overlay Sheets for all models included, Statistic Sheets, 10 Halo Dice and Assembly Guides.



Plastic models moulded in grey, resin models in grey, assembly is required

10 HALO DICE INCLUDED

15 HIGHLY-DETAILED SHIP MODELS
plus **PLASTIC FORMATION BASES** and **SHIP OVERLAY SHEETS**
